

Angers 6 december 2018

LIVESEED, ECO-PB & CPVO Workshop on Heterogeneous Material and Organic Varieties

**Participation by Italy to the
Commission Implementing Decision (2014/150/EU)
temporary experiment for the marketing of
populations of the plant species wheat, barley,
(oats and maize)**

Pier Giacomo Bianchi & Maria Losi

- 
- 2015/2016 - Expression of interest by producers
 - 2016/2017 - 8 applications (Barley, wheat, durum wheat) no production - field inspection
 - 2017/2018 - 8 applications (Barley, wheat, durum wheat) - field inspection (17 hectares) and post control & lab testing (germination, purity, other seeds determination)

2017/2018 - Number of populations

- 1 Barley (642 kg certified)
- 3 wheat (71.800 kg certified)
- 4 Durum wheat (8,35 kg certified)

2018/2019 - 8 applications (Barley,
wheat, durum wheat) -
field inspection
(29 hectares)

Estimation of seed
production:
94.000 kg

Wheat

1. SOLIBAM tenero FLORIDDIA
2. SOLIBAM tenero LI ROSI
3. BIOADAPT

Durum wheat

1. SOLIBAM DURO RECCHIA
2. SOLIBAM DURO PETACCIATO
3. SOLIBAM DURO FLORIDDIA
4. EVOLDUR13a

Barley

1. MIX48

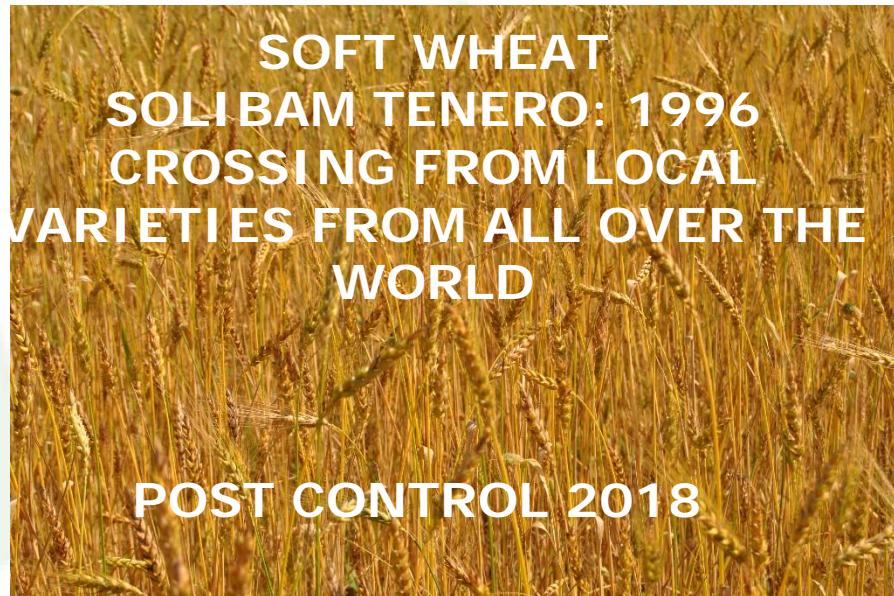

Field visit

- Traceability of seed used
- Previous cropping
- Isolation
- Identification of the population
- General conditions of the crop
- Other species, lodging
- Plant health, pests, weeds
- Estimation of seed production
- Reporting

Comparative trials: post control (untreated, no fertilization)

Characters used for observations:

- plant height
- time of flowering
- glaucosity stem
- glaucosity ear
- shape ear
- awns/scurs (presence/absence/colour)

Main reason for rejections in field inspection

- Mixture of durum and soft wheat
- Presence of other species or weeds
- Diseases (*Ustilago*)

Looking forward

- Surface is increasing
- Field inspection, lab testing and post control continuing
- More experience is needed
- Exploring stability of frequency of character expression
- Tuning on checks to be carried out by the Seed certification Agency
- Joint comparative trial including German and italian population (wheat durum wheat and barley)

Comparative trials 2019

- **Wheat (3 ITA – 3 DEU)**
- **Durum wheat (3 ITA)**
- **Barley (1 ITA)**
